

Job Description: Business Support

Location: Uplands, Swansea

Closing Date: 30th January 2018

Background

GreenSeas Resources Ltd (GreenSeas) is a Pembrokeshire-based company established to develop value chains from the management and commercial growing of seaweed.

GreenSeas has secured funding for a pilot project in the Milford Haven waterway which aims to collect seaweed as a way of addressing the impacts of high nutrient levels in the waterway, and use the material to produce agricultural and horticultural products.

GreenSeas is also developing a pilot seaweed and shellfish farm to focus on the food market, and potentially other markets.

The Role

GreenSeas requires additional resources to support the development of the business.

The role will help implement new business processes, and explore future product/market opportunities to inform the development of the R&D strategy.

The recruitment of the role will initially be through Swansea University's Work Placement Scheme, hence will be for a fixed period of 350 hours.

This can be full-time for 3 months, or part-time and spread out over a longer period.

Key requirements

- Understanding of business management practices
- Experience of financial modelling
- Comfortable analyzing and presenting complex data/information
- Interest in sustainability and/or aquaculture
- Self-motivated and able to work without supervision
- Enthusiastic and friendly with a flexible and positive 'can do' attitude
- Current computer literacy
